

Linebacker Alignment Clamp

Let Cumberland's Linebacker Alignment Clamp simplify your next natural gas fusion project. The size specific alignment clamps help ensure that the pipes are correctly aligned and held securely in place during the electrofusion process.

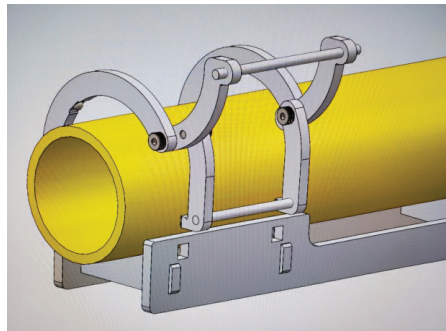

The lightweight aluminum body has an easy to operate latching mechanism that restrains tough to handle pipe preventing potential pullback or movement during the fusion and cooling time.

Features

- 3 to 1 weight ratio compared to steel helps lessen the strain on an operator's muscles
- Simple clamping and latching mechanism provides a quick and easy operation
- Securely restrains the pipe and prevents pullback or movement
- Suitable for straight or coiled pipe
- Available in single sizes from 2" up to 12"

Part Number	Description
IQL2	2"
IQL3	3"
IQL4	4"
IQL6	6"
IQL8	8"
IQL10	10"
IQL12	12"
