

PREVENT INJURIES Pig Pen

When pigging, protect your team and bystanders with the Pig Pen!

The Pig Pen is designed with tuff mesh, stainless steel safety collars, and a stop plate shock system to safely collect foam pigs and debris that come out of the gas pipeline while pigging. Most importantly though, the Pig Pen protects those around the job site from projectiles that may otherwise be launched from the pipe end.

Features

- Versatile tool that can be used on multiple PE pipe sizes
 - Standard collars: 2", 4", 6"
 - Add-on options: 1-1/4", 3"
- Easily installs in minutes without the need for additional tools
- Corrosion resistant
 - Stainless steel safety collars and cabling
- Durable and reusable
- Compact design takes little truck space
- Collects pigs and allows you to account for what was launched
- Prevents damage to pigs and surrounding area

After placing the safety collar around the pipe, the pipe slides into the mesh down to the stop plate shock system.

Part Number	Description
PPE550-744	Pig Pen with Collar Sizes for 2", 4", and 6" PE Pipe
LC420	1-1/4" Add-on Collar with Screw Clip
LC650	3" Add-on Collar with Screw Clip
